SUBJECT INDEX

ARIMA models
An analysis of Indian tide-gauge records 177
Alleppey coast
Removal of sediments from the Alleppey nearshore region during post-mud bank formation 195
Annual cycle
The warm pool in the Indian Ocean 165
Anomaly crest region
Comparative study of scintillations at the magnetic equator and at the crest region of the equatorial anomaly in Indian zone 331
Appraisal of inference
Methodological appraisal: Two examples 309
Arabian Sea
Evolution of salinity field in the upper layers of the east central Arabian Sea and northern Bay of Bengal during summer monsoon experiments 69
Archaen
Geology, geochemistry and geochronology of the Archaean Peninsular Gneiss around Gorur, Hassan District, Karnataka, India 399

Basic granulites
Coexisting pyroxenes from the basic granulites of Visakhapatnam area in the Eastern Ghats terrain 281
Bay of Bengal
Evolution of salinity field in the upper layers of the east central Arabian Sea and northern Bay of Bengal during summer monsoon experiments 69
Bearinag Thrust
Stratigraphy of the Lesser Himalayan rocks in Kumaun 293
Biotite alternation
Copper-bearing clay minerals of the oxidized zone of the Rakha-Chapri Block, Singhbhum Copper Belt, India 13
Boundary Layer
High resolution radio refractive index studies in India using airborne microwave refractometers 145
Brittle
Rheology of Indian continental crust and upper mantle 389
Broad band
Preliminary results from very long period data collected by a broad band digital seismic station 369

C-grid
Adiabatic nonlinear normal mode initialization for a grid point global model 79
Central pressure
On the gross predictability of tropical monsoonal depressions 127
Charnockite
Relationship between shear zones and igneous activity: The Closepet Granite of Southern India 31
Circulation
Premonsoonal water characteristics and circulation in the east central Arabian Sea 55
Closepet Granite
Sedimentational, structural and migmatitic history of the Archaean Dharwar tectonic province, southern India 413
Coexisting pyroxenes
Coexisting pyroxenes from the basic granulites of Visakhapatnam area in the Eastern ghats terrain 281
Convective parametrization
On the gross predictability of tropical monsoonal depressions 127
Copper in clays
Copper-bearing clay minerals of the oxidized zone of the Rakha-Chapri Block, Singhbhum Copper Belt, India 13
Cryst
Rheology of Indian continental crust and upper mantle 389
Cumulus convection
Cumulus convection and lateral boundary conditions in a limited area model 235
Cyclones
On the gross predictability of tropical monsoonal depressions 127

Deformation
Relationship between shear zones and igneous activity: The Closepet Granite of Southern India 31
Dharwar tectonic province
Sedimentational, structural and migmatitic history of the Archaean Dharwar tectonic province, southern India 413

Dip equator
The dip equator over Peninsular India and its secular movement 361
Displacement
Static deformation of two welded half-spaces due to very long strike-slip dislocations 379
Ductile
Rheology of Indian continental crust and upper mantle 389

East central Arabian Sea
Premonsoonal water characteristics and circulation in the east central Arabian Sea 55
Eigenvalues
Applications of principal component analysis to understand variability of rainfall 105
Empirical orthogonal functions
Application of principal component analysis to understand variability of rainfall 105
Entrophy
Adiabatic nonlinear normal mode initialization for a grid point global model 79
Equatorial Indian Ocean
The warm pool in the Indian Ocean 165
Equatorial Pacific Ocean
The warm pool in the Indian Ocean 165
Equatorial region
Comparative study of scintillations at the magnetic equator and at the crest region of the equatorial anomaly in Indian zone 331
Equilibrium decomposition
Standard thermodynamic data for Rhodochrosite from equilibrium decomposition curve 37
Erratum 307
Escaping waves
Lightning-generated waves escaping out through plasma holes in the nightside Venus ionosphere 321
Evolution of continental crust
Geology, geochemistry and geochronology of the Archaean Peninsular Gneiss around Gorur, Hassan District, Karnakata, India 399

F region irregularities
Comparative study of scintillations at the magnetic equator and at the crest region of the equatorial anomaly in Indian zone 331

General circulation
Adiabatic nonlinear normal mode initialization for a grid point global model 79
Geochemistry
Geology, geochemistry and geochronology of the Archaean Peninsular Gneiss around Gorur, Hassan District, Karnataka, India 399
Geomagnetic activity
Variations in the strength of recurrent geomagnetic activity in solar cycles 11 to 21 49
Granite
Relationship between shear zones and igneous activity: The Closepet Granite of Southern India 31

Granulite terrain
Coexisting pyroxenes from the basic granulites of Visakhapatnam area in the Eastern Ghats terrain 281
Gravity field
Sensitivity of launch systems to gravity field 41
Gravity waves
Adiabatic nonlinear normal mode initialization for a grid point global model 79
Group velocity
Preliminary results from very long period data collected by a broad band digital seismic station 369

Heat transfer surface area
Radon modelling and the heat transfer surface area of the British hot dry rock geothermal reservoir 1
Horizontal homogeneity
High resolution radio refractive index studies in India using airborne microwave refractometers 145
Horizontal strike-slip fault
Static deformation of two welded half-spaces due to very long strike-slip dislocations 379
Hot dry rock geothermal reservoir
Radon modelling and the heat transfer surface area of the British hot dry rock geothermal reservoir 1
Hydrothermal equilibrium
Standard thermodynamic data for Rhodochrosite from equilibrium decomposition curve 37

IGRF
The dip equator over Peninsular India and its secular movement 361
Illite
Copper-bearing clay minerals of the oxidized zone of the Rakha-Chapri Block, Singhbhum Copper Belt, India 13
Inertially guided systems
Sensitivity of launch systems to gravity field 41
Initialization
Adiabatic nonlinear normal mode initialization for a grid point global model 79
Intraseasonal fluctuations
Water vapour periodicities over Indian Ocean during contrasting monsoons from NOAA satellite data 341
Inversion
Atmospheric surface layer characteristics with MONTBLEX data 219
Ionospheric scintiallations
Comparative study of scintillations at the magnetic

equator and at the crest region of the equatorial anomaly in Indian zone 331

Kaolinite
Copper-bearing clay minerals of the oxidized zone of the Rakha-Chapri Block, Singhbhum Copper Belt, India 13
Kumaun Lesser Himalaya
Stratigraphy of the Lesser Himalayan rocks in Kumaun 293
Kuo's cumulus parameterization
Cumulus convection and lateral boundary conditions in a limited area model 235

Lateral boundary conditions
Cumulus convection and lateral boundary conditions in a limited area model 235
Launch systems
Sensitivity of launch systems to gravity field 41
Limited area model
Cumulus convection and lateral boundary conditions in a limited area model 235
Line electron density
Sporadic E ionization associated with meteor events 255

MONTBLEX
Atmospheric surface layer characteristics with MONTBLEX data 219
Maximum entropy spectral analysis
Variations in the strength of recurrent geomagnetic activity in solar cycles 11 to 21 49
Meteoric ionization
Sporadic E ionization associated with meteor events 255
Methodology of inference
Methodological appraisal: Two examples 309
Microwave refractometer
High resolution radio refractive index studies in India using airborne microwave refractometers 145
Migmatitic history
Sedimentational, structural and migmatitic history of the Archaean Dharwar tectonic province, southern India 413
Migration
The dip equator over Peninsular India and its secular movement 361
Monsoon
Application of principal component analysis to understand variability of rainfall 105
Removal of sediments from the Alleppey nearshore region during post-mud bank formation 195
Water vapour periodicities over Indian Ocean during contrasting monsoons from NOAA satellite data 341
Monsoon rain
An analysis of Indian tide-gauge records 177
Mud suspension
Removal of sediments from the Alleppey nearshore region during post-mud bank formation 195
Mud tank
Removal of sediments from the Alleppey nearshore region during post-mud bank formation 195
Multilayered half-space
Static deformation of an orthotropic multilayered elastic half-space by two-dimensional surface loads 205

Mylonite
Relationship between shear zones and igneous activity: The Closepet Granite of Southern India 31

NOAA satellite
Water vapour periodicities over Indian Ocean during contrasting monsoons from NOAA satellite data 341
Nightside Venus ionosphere
Lightning-generated waves escaping out through plasma in the nightside Venus ionosphere 321
Normal line load
Static deformation of an orthotropic multilayered elastic half-space by two-dimensional surface loads 205
Normal modes
Adiabatic nonlinear normal mode initialization for a grid point global model 79
Numerical model
On the gross predictability of tropical monsoonal depressions 127

Orthotropic medium
Static deformation of an orthotropic multilayred elastic half-space by two-dimensional surface loads 205

Oxidized zone
Copper-bearing clay minerals of the oxidized zone of the Rakha-Chapri Block, Singhbhum Copper Belt, India 13

Palaeomagnetism
Methodological appraisal: Two examples 309
Peninsular gneiss
Sedimentational, structural and migmatitic history of the Archaean Dharwar tectonic province, southern India 413
Geology, geochemistry and geochronology of the Archaean Peninsular Gneiss around Gorur, Hassan District, Karnataka, India 399
Phase velocity
Preliminary results from very long period data collected by a broad band digital seismic station 369

Physical model
On the gross predictability of tropical monsoonal depressions 127
Planetary lightning
Lightning-generated waves escaping out through plasma holes in the nightside Venus ionosphere 321
Plasma holes
Lightning-generated waves escaping out through plasma holes in the nightside Venus ionosphere 321
Plume-like irregularity
Comparative study of scintillations at the magnetic equator and at the crest region of the equatorial anomaly in Indian zone 331
Poletide
An analysis of Indian tide-gauge records 177
Predictability
Application of principal component analysis to understand variability of rainfall 105
Prediction
On the gross predictability of tropical monsoonal depressions 127
Premonsoon
Premonsoonal water characteristics and circulation in the east central Arabian Sea 55
Principal components
Application of principal component analysis to understand variability of rainfall 105

Radio refractivity
High resolution radio refractive index studies in India using airborne microwave refractometers 145
Radon modelling
Radon modelling and the heat transfer surface area of the British hot dry rock geothermal reservoir 1
Radon transfer surface
Radon modelling and the heat transfer surface area of the British hot dry rock geothermal reservoir 1
Rainfall variability
Application of principal component analysis to understand variability of rainfall 105
Rb–Sr geochronology
Geology, geochemistry and geochronology of the Archaean Peninsular Gneiss around Gorur, Hassan District, Karnataka, India 399
Return echo
Numerical experiment with modelled return echo of a satellite altimeter from a rough ocean surface and a simple iterative algorithm for the estimation of significant wave height 155
Rheology
Rheology of Indian continental crust and upper mantle 389
Rhodochrosite
Standard thermodynamic data for Rhodochrosite from equilibrium decomposition curve 37
Ridge-valley
Gravity induced near-surface stresses in long-symmetric ridge-valley systems 267
Rossby waves
Adiabatic nonlinear normal mode initialization for a grid point global model 79

Salinity variability
Evolution of salinity field in the upper layers of the east central Arabian Sea and northern Bay of Bengal during summer monsoon experiments 69
Salt budget of the mixed layer
Evolution of salinity field in the upper layers of the east central Arabian Sea and northern Bay of Bengal during summer monsoon experiments 69
Satellite altimeter
Numerical experiment with modelled return echo of satellite altimeter from a rough ocean surface and a simple iterative algorithm for the estimation of significant wave height 155
Sea surface temperature
The wearm pool in the Indian Ocean 165
Secular variation
The dip equator over Peninsular India and its secular movement 361
Sediment dynamics
Removal of sediments from the Alleppey nearshore region during post-mud bank formation 195
Sedimentation
Sedimentational, structural and migmatitic history of the Archaean Dharwar tectonic province, southern India 413
Seismicity classification
Methodological appraisal: Two examples 309
Shear line load
Static deformation of an orthotropic multilayered elastic half-space by two-dimensional surface loads 205

Shear stresses
Static deformation of two welded half-spaces due to very long strike-slip dislocations 379
Shear zone
Relationship between shear zones and igneous activity: The Closepet Granite of Southern India 31

Significant wave height
Numerical experiment with modelled return echo of a satellite altimeter from a rough ocean surface and a simple iterative algorithm for the estimation of significant wave height 155
Singhbhum Copper Belt
Copper-bearing clay minerals of the oxidized

zone of the Rakha-Chapri block, Singhbhum Copper Belt, India 13
Solar cycles
Variations in the strength of recurrent geomagnetic activity in solar cycles 11 to 21 49
Spatial structure
Application of principal component analysis to understand variability of rainfall 105
Spectral analysis
An analysis of Indian tide-gauge records 177
Spilites
Stratigraphy of the Lesser Himalayan rocks in Kumaun 293
Spong damping
Cumulus convection and lateral boundary conditions in a limited area model 235
Sporadic E
Sporadic E ionization associated with meteor events 255
Stability
Atmospheric surface layer characteristics with MONTBLEX data 219
Static deformation
Static deformation of an orthotropic multilayered elastic half-space by two dimensional surface loads 205
Static deformation of two welded half-spaces due to very long strike-slip dislocations 379
Stratigraphy
Stratigraphy of the Lesser Himalayan rocks in Kumaun 293
Stresses
Gravity induced near-surface stresses in long-symmetric ridge-valley systems 267
Structural history
Sedimentational, structural and migmatitic history of the Archaean Dharwar tectonic province, southern India 413
Summer monsoon season
Evolution of salinity field in the upper layers of the east central Arabian Sea and northern Bay of Bengal during summer monsoon experiments 69
Surface fluxes
Atmospheric surface layer characteristics with MONTBLEX data 219
Surface layer
Atmospheric surface layer characteristics with MONTBLEX data 219
Surface waves
Preliminary results from very long period data collected by a broad band digital seismic station 369
Syntectonic emplacement
Geology, geochemistry and geochronology of the Archaean Peninsular Gneiss around Gorur, Hassan District, Karnataka, India 399

Thermal model
Radon modelling and the heat transfer surface area of the British hot dry rock geothermal reservoir 1
Tidal gauge records
An analysis of Indian tide-gauge records 177
Topography
Gravity induced near-surface stresses in long-symmetric ridge-valley systems 267
Transfer matrix
Static deformation of an orthotropic multilayered elastic half-space by two-dimensional surface loads 205
Transition probability
Application of principal component analysis to understand variability of rainfall 105
Trondhjemites
Geology, geochemistry and geochronology of the Archaean Peninsular Gneiss around Gorur, Hassan District, Karnataka, India 399
Tropics
High resolution radio refractive index studies in India using airborne microwave refractometers 145
Turbulence
High resolution radio refractive index studies in India using airborne microwave refractometers 145
Two-dimensional surface loads
Static deformation of an orthotropic multilayered elastic half-space by two-dimensional surface loads 205

Upper layers
Evolution of salinity field in the upper layers of the east central Arabian Sea and northern Bay of Bengal during summer monsoon experiments 69
Upper mantle
Rheology of Indian continental crust and upper mantle 389

Vertical strike-slip fault
Static deformation of two welded half-spaces due to very long strike-slip dislocations 379

Warm pool
The warm pool in the Indian Ocean 165
Water characteristics
Premonsoonal water characteristics and circulation in the east central Arabian Sea 55
Water vapour
Water vapour periodicities over Indian Ocean during contrasting monsoons from NOAA satellite data 341
Waves in planetary atmosphere
Lightning-generated waves escaping out through plasma holes in the nightside Venus ionosphere 321
Wind profile
Atmospheric surface layer characteristics with MONTBLEX data 219
